

NURSERY SUPPLIES, INC. Uses Post-Consumer HDPE Plastic

Nursery Supplies, Inc. is the country's leading manufacturer of nursery containers. Founded in 1957 and based in Chambersburg, Pennsylvania, nursery supplies has three additional manufacturing plants located in the United States. The company uses various processing methods to manufacture their nursery containers. The methods include blow molding, injection molding, high-speed pressure forming and vacuum forming. These various processing options, enable the company to manufacture nursery containers ranging from one quart to 270 gallons in size with various thickness and colors choices. They also manufacture plant trays and pouches.

Nursery Supplies has a long history of diverting recovered post-consumer high density polyethylene (HDPE) from landfills by using HDPE as one of their raw materials to manufacture many of their nursery containers. During the last 12 months, Nursery Supplies has diverted in excess of 12 million pounds of post-consumer HDPE and has capacity to divert up to 25 million pounds. Nursery Supplies is looking for Pennsylvania source(s) of ground post-consumer HDPE. If you have this recyclable material in ground form, please contact us by telephone at 717-261-4340. For more information on their various products, please go to their web site at: www.nurserysupplies.com
