You're ready for the Business Energy Checkup! If you'd like help getting started, please click on "How to use" in the navigation bar to the left.

Business Energy Checkup follows the five stages of the U.S. EPA's Energy Star Buildings program for improving energy efficiency:

1. Lighting
2. Building tune-up
3. Other loads
4. Fan systems
5. Heating and cooling

These five stages are set up to show you the most logical and comprehensive sequence for making efficiency investments in typical buildings.

Details on the Energy Star Buildings program are available through the online version of the Energy Star Buildings Upgrade Manual at <http://www.epa.gov/appdstar/buildings/manual/>
