

WORKGROUP WORKSHEET

(NPS workgroup, e.g. Land Disposal)

Part I. Highlights

The following are potential ideas of things we can brag about.

Please come prepared to the October 23rd meeting to share with us your program area's contributions.

What accomplishments from your program have occurred over the past year that help to achieve the Goals / Objectives / Milestones in your workgroup's section of the PA NPS Management Program 1999 Update?

Accomplishments can be specific to the NPS Action Plan milestones such as,

1. New watershed plans that incorporate prevention and remediation of pollution from resource extraction activities.
2. Installation of BMPs to reduce impacts of nutrients from surface and groundwater by 2015.
3. By 2004 increase by 50 the number of local governments that adopt sewage management programs. Number of onlot remediation projects funded through PENNVEST.
4. Beginning in 2000, each Stormwater Management Plan incorporates water quality design and pollutant reduction.

Accomplishments generic to all workgroups are,

5. Has any legislation been passed in the last year that has impacted your program negatively or positively and if so briefly explain the impact?
6. If you had to pick one highlight of your programs's accomplishments this past year, what would it be?

Include references to specific parts of the NPS Management Program Action Plans. For example,

Accomplishments 1 and 2 provide information for MER (Milestone and Implementation Step) A. and C.

Accomplishment 3 provides information for MER (Milestone and Implementation Step) B.

Part II.

*The following questions will be discussed at the individual workgroup sessions scheduled at the October 23rd meeting and will be answered as a workgroup. Please refer to Section I of the **Pa Nonpoint Source Management Program 1999 Update** for your workgroup's specific Goals / Objectives / Milestones. The **1999 Update** can be viewed at www.dep.state.pa.us. At the DEP keyword type in "watersheds." At the Bureau of Watershed Management homepage, go to Main Topics and select Watersheds and NPS Management, then click on Nonpoint Source Management Program-September 1999 Update.*

From your small workgroup's goals / objectives / milestones scheduled to be completed in the past year or previous years, which were accomplished in the past year:

From your workgroup's goals/objectives/ milestones, which will be the priority to accomplish in the next year?

Identify what the work group believes are the challenges the state faces to achieve the goals / objectives / milestones over the next year? The next 2 –3 years?
